can't stop freeradius daemon on Ubuntu 13.10

I have installed freeradius via apt-get and can't stop freeradius daemon.

```
# freeradius -v
freeradius: FreeRADIUS Version 2.1.12, for host x86_64-pc-linux-gnu, built on Feb 24 2014 at 15:09:01

# /etc/init.d/freeradius stop
```

radius.log.

```
# tail -f /var/log/freeradius/radius.log
Tue Apr 15 00:36:08 2014 : Info: Ready to process requests.
Tue Apr 15 00:22:47 2014 : Info: Signalled to terminate   <- terminate
Tue Apr 15 00:22:47 2014 : Info: Exiting normally.
Tue Apr 15 00:22:47 2014 : Info: Loaded virtual server <default>  <- start up again
Tue Apr 15 00:22:47 2014 : Info: Loaded virtual server inner-tunnel
Tue Apr 15 00:22:47 2014 : Info:  ... adding new socket proxy address * port 361
```

This seems to be caused by that there is no PID file /var/log/freeradius/freeradius.pid.
After creating the pid file for radiusd, I was able to shut down the daemon.

create a PID file and change an owner.

```
# touch /var/run/freeradius/freeradius.pid

# chown freerad.freerad /var/run/freeradius/freeradius.pid
```

I was able to shut down the daemon.

```
# /etc/init.d/freeradius stop

# tail -f /var/log/freeradius/radius.log
Tue Apr 15 00:41:09 2014 : Info: Signalled to terminate
Tue Apr 15 00:41:09 2014 : Info: Exiting normally.

# lsof -ni:1812
#
```

g+1   +1   Recommend this on Google
